ASSESSMENT GUIDE

COMM1120

Collaboration and Innovation in Business

Term 2, 2026

Assessment Summary

Assessment Task	Weighting	Due Date*	Learning Outcomes
Assessment 1: Creativity and Innovation in Everyday Life Individual	15%	Week 2: 3pm, Thursday, 11 th of June 2026	CLO4, CLO5 PLO3, PLO6, PLO7
Assessment 2: Problem Definition and Project Plan Group	20%	Week 5: In class	CLO1, CLO2, CLO3, CLO4, CLO5, CLO6 PLO2, PLO3, PLO4, PLO6, PLO7
Assessment 3: Solution Delivery Group	30%	Week 10: In class	CLO1, CLO2, CLO3, CLO4, CLO5, CLO6 PLO2, PLO3, PLO4, PLO6, PLO7 myBCom points for PLO4
Assessment 4: The Redesign Challenge Individual	35%	Week 11: 3pm, Thursday, 13 th of August 2026	CLO1, CLO3, CLO4, CLO5 PLO3, PLO6, PLO7 myBCom points for PLO6 & PLO7

* Due dates are set at [Australian Eastern Standard/Daylight Time](#) (AEST/AEDT). If you are located in a different time-zone, you can use the [time and date converter](#).

Course Learning Outcomes (CLO)

- **CL01:** Examine the causes of a societal problem through divergent and convergent collaborative approach. [PLO2; PLO3; PLO4]
- **CL02:** Apply effective collaborative and project management skills to complete team project. [PLO2; PLO3; PLO4; PLO7]
- **CL03:** Create an innovative solution that addresses a societal and business problem. [PLO2; PLO6]
- **CL04:** Communicate ideas in a succinct and clear manner that demonstrates differing perspectives in persuasive communication practices [PLO3]
- **CL05:** Recognise diverse perspectives and worldviews of others to inform innovative and collaborative processes. [PLO6]
- **CL06:** Evaluate personal development of learning through reflection on the contributions of self and peers within the teamwork process. [PLO4; PLO7]

Please Note: Your assessment tasks in this course will also measure your fulfilment of the criteria for your **Program Level Outcome 3: Business Communication - Students will harness, manage, and communicate business information effectively using multiple forms of communication across different channels.** You will be provided valuable feedback after Assessment 1 and 2, which will assist you in developing your business communication skills over the duration of this course. This is a fantastic opportunity for you to utilise the support to develop your communication skills in a learning environment

Format

Length/Duration

Submission

Turnitin

Turnitin is an originality checking and plagiarism prevention tool that enables checking of submitted written work for improper citation or misappropriated content. Each Turnitin assignment is checked against other students' work, the Internet and key resources selected by your Course Coordinator.

If you are instructed to submit your assessment via Turnitin, you will find the link to the Turnitin submission in your Moodle course site. You can submit your assessment well before the deadline and use the Similarity Report to improve your academic writing skills before submitting your final version.

You can find out more information in the [Turnitin information site for students](#).

Late Submissions

Late submission will incur a penalty of 5 marks per day or part thereof (including weekends) from the due date and time. An assessment will not be accepted after 5 days (120 hours) of the original deadline unless special consideration has been approved. An assignment is considered late if the requested format, such as hard copy or electronic copy, has not been submitted on time or where the 'wrong' assignment has been submitted.

Ensure you leave enough time to submit as technological difficulties are not eligible for special consideration.

The parameters for late submissions are outlined in the [UNSW Assessment Implementation Procedure](#).

Extensions

You are expected to manage your time to meet assessment due dates. If you do require an extension to your assessment, please make a request as early as possible before the due date via the special consideration portal on [myUNSW](#) (My Student profile > Special Consideration). You can find more information on Special Consideration and the application process below.

Special Consideration

Special consideration is the process for assessing the impact of short-term events beyond your control (exceptional circumstances), on your performance in a specific assessment task.

What are circumstances beyond my control?

These are exceptional circumstances or situations that may:

- Prevent you from completing a course requirement,
- Keep you from attending an assessment,
- Stop you from submitting an assessment,
- Significantly affect your assessment performance.

Available here is a [list of circumstances](#) that may be beyond your control. This is only a list of examples, and your exact circumstances may not be listed.

You can find more detail and the application form on the [Special Consideration](#) site, or in the [UNSW Special Consideration Application and Assessment Information for Students](#).

Equitable Learning Services

Equitable Learning Services provide support with customised educational strategies, adjustments, and assistive technology to meet the unique needs of students who have chronic medical conditions, disabilities, and/or neurodivergent conditions. Please reach out to the service early in the term if needed. <https://www.student.unsw.edu.au/equitable-learning>

Generative AI and Translation Tools

You may use AI-based software to research and prepare prior to completing writing your assessments. You are permitted to use standard editing and referencing functions in word processing software. This is limited to spelling and grammar checking and reference citation generation in the creation of your submission. You must not use any functions that generate or paraphrase or translate passages of text, whether based on your own work or not. This includes work in your written assessments and your presentation scripts and slides.

Generative AI is one tool available to use among a range of others when research topics. It is not always accurate and can reproduce inaccurate content and non-existent reference materials. It is important to take care to check the accuracy of the information it generates by finding original source materials and searching for differing perspectives from other resources. ChatGPT is OpenAI, so personal details and copyrighted content should not be shared through the platform.

There are resources available about how best to use generative AI available here:

<https://www.student.unsw.edu.au/skills/ai>

When you have used AI, you should ensure that it is noted, such as in the online workbook and in Assessments 2 and 3. As the other written assessments are personal reflections, using Generative AI as part of your research is not necessary and, as stated above, cannot be used in generating, paraphrasing, or translating texts. For more information about AI and assessment, see here:

<https://www.student.unsw.edu.au/assessment/ai>

Please note that your submission will be passed through an AI-generated text detection tool.

If your marker has concerns that your answer contains passages of AI-generated text, you may be asked to explain your work. If you are unable to satisfactorily demonstrate your understanding of your submission you may be referred to UNSW Conduct & Integrity Office for investigation for academic misconduct and possible penalties.

Acceptable use in background research:

- Preliminary understanding: Consult generative AI to get a basic understanding of a topic before diving into primary source research.
- Research assistance: Employ generative AI to provide overviews of complex topics, which you will then verify with primary sources (e.g. Scite https://primoa.library.unsw.edu.au/permalink/61UNSW_INST/1m02euc/alma9951464954501731)
- Diverse perspectives: Use generative AI to identify various perspectives on a topic, ensuring to cross-check for accuracy with reliable sources.

Unacceptable use in producing an assessment task:

- Content creation: Do not use generative AI to write or draft any parts of your assessment submission.

- Paraphrasing: Avoid using generative AI to reword or paraphrase passages for inclusion in your work.
- Translation: Do not use generative AI to translate text that will be used in your submission.
- Direct editing: Do not use generative AI for editing functions beyond basic spelling and grammar checks provided by standard word processing software.
- Reference generation: Do not use generative AI to generate citation formats for inclusion in your submission.

Documentation and integrity:

- Disclosure: Clearly note any use of generative AI in your research process, as required, such as in the online workbook.
- Verification: After using generative AI for research, thoroughly verify the information against original sources and ensure understanding of the material.
- Personal reflections: Do not use generative AI at all for personal reflection tasks, as these are based on your own thoughts and experiences.

In case of review:

- Explanation preparedness: Be prepared to explain your work and demonstrate a thorough understanding of the content and sources of your submission if questioned.
- Academic integrity: Maintain the integrity of your work by avoiding the use of generative AI for tasks where it is prohibited and follow all guidelines for proper citation and originality.
- **Please ensure you keep version histories of your work as you will be asked to provide detailed history to the work produced.**

Following these guidelines will help ensure that generative AI is used as a tool for enhancing your research and learning, rather than replacing your own efforts and understanding in the creation of academic work.

REVIEW OF RESULTS FORM

If you are interested in getting a review on your assessment results, please send this completed form to comm1120@unsw.edu.au and cc your tutor. Please consult your tutor beforehand and gather additional feedback. Your tutor's contact information is under 'Teaching Team Contact Details' on Moodle. Please submit this form within 5 business days of receiving your marks.

Tutorial and Tutor Name:

CRITERIA (FROM MARKING RUBRIC)	GRADE RECEIVED	PROPOSED GRADE	CORRESPONDING CRITERIA FOR PROPOSED GRADE (COPY AND PASTE DIRECTLY FROM MARKING RUBRIC)	JUSTIFICATION LINKED TO RUBRIC CRITERIA

Assessment 1: Creativity and Innovation in Everyday Life

	Week 2: 3pm, Thursday, 11 th of June 2026
	15%
	Individual writing task
	700 words $\pm$ 10% (excluding reference list)
	Via Moodle course site, through Turnitin

Assessed Learning Objectives

- **CL04:** Communicate ideas in a succinct and clear manner that demonstrates differing perspectives in persuasive communication practices [PLO3]
- **CL05:** Recognise diverse perspectives and worldviews of others to inform innovative and collaborative processes. [PLO6]

Description of Assessment Task

This assessment asks you to explore how creativity and innovation appear in your everyday life. You will:

- Take two original photographs
- Reflect on their meaning
- Connect your observations to Week 1 concepts

The goal is to help you recognise and explain creativity and innovation in real-world contexts.

Approach to the Assessment Task

Step 1: Take two original photos

- **Photo 1:** Creativity in your daily life
- **Photo 2:** Innovation in your daily life

These must be your own photos, taken specifically for this assessment.

For each photo, include:

- Date taken
- Suburb/location
- Device used

You must also include:

- A screenshot of the photo metadata (showing date, time, and device) in the appendix. Instructions are provided below on page 8.

Step 2: Write a 700-word reflection (+/-10%)

Your reflection should address both photos and include:

1. Description

- What is shown in each photo?
- What was happening at the time?

2. Personal response

- What were your initial thoughts or feelings?
- Why did these moments stand out to you?

3. Connection to course concepts

- How do your photos relate to ideas from Week 1?
- Use relevant concepts or definitions from the course

4. Reflection and insight

- What did you learn from this task?
- How might this change how you notice or apply creativity and innovation?

Submission Instructions

Submit one Word document via Moodle (Turnitin), including:

In the main body:

- Your 700-word reflection
- The two photos with captions

In the appendix:

- Metadata screenshots for each photo (*Instructions on how to get metadata from photos are below*).

Formatting requirements

- Word document (.doc or .docx)
- 12 pt Arial font
- 1.5-line spacing
- Standard margins

Referencing is not required. If used, follow UNSW Harvard style.

Instructions on How to Find Metadata for Your Photos (Assessment 1 Requirement)

For this assessment, you need to submit the **metadata** of the photos you take. Metadata is information automatically saved with your photo, such as the **date, time, and location** it was taken.

What you need to include

Please provide a screenshot or file showing:

- Date the photo was taken
- Time the photo was taken
- Location (if available)

On a Smartphone (iPhone or Android)

iPhone	Android
1. Open the Photos app	1. Open the Gallery or Google Photos app
2. Select your photo	2. Select your photo
3. Swipe up on the photo (or tap the ⓘ info icon)	3. Tap the three dots (⋮) or swipe up
4. You will see details such as date, time, and location	4. View the photo details (date, time, location)
5. Take a screenshot of this screen	5. Take a screenshot of this screen

On a Computer (Windows or Mac)

Windows	Mac
1. Right-click on the image file	1. Right-click on the image file
2. Select Properties	2. Select Get Info
3. Click the Details tab	3. Expand the More Info section if needed
4. Take a screenshot showing the relevant information	4. Take a screenshot of the details

Important Tips 💡

- Make sure your device has **location services enabled** before taking photos
- Do not edit or screenshot the photo before checking metadata, as this can remove information
- Ensure the metadata clearly matches the photo you are submitting

If your metadata is missing 🤖

- Check your device settings (location services or camera permissions)
- Use another device if possible
- Contact your tutor if you are unsure

Assessment 2: Project Definition and Project Plan

	During Week 5 workshop/tutorial
	20%
	Team oral presentation
	5 minutes and 30 seconds presentation, 2 minutes Q&A
	Live during Week 5; slides to be submitted on Moodle 5pm the day prior

Description of assessment task

In your team, you will present a problem definition and a project plan for addressing a societal issue. The presentation should align with the Double Diamond Framework and showcase your team's ability to collaborate effectively and plan for innovative solutions.

Approach to the assessment task

Your presentation must address the following key areas:

1. Problem Context:

- Provide a background on your chosen macro theme/problem.
- Identify root causes, ecosystem, and assumptions related to the problem.
- Demonstrate the use of analysis tools such as Fishbone Analysis or 5Ws1H.
- Explain your stakeholder engagement strategy, the feedback collected and how it informed your understanding of the problem.

2. Problem Definition:

- Frame the problem using a well-crafted "How Might We?" statement.
- Ensure the problem is clearly defined.

3. Team Collaboration:

- Explain the key roles and responsibilities identified in your Team Agreement along with any other key insights.
- Discuss how these roles and insights contribute to effective collaboration and innovation through a specific example that has occurred while working together.
- Reflect on one teamwork challenge, adjustment, or insight that emerged while working together and explain how it influenced your team's collaboration, communication, or project approach.

4. Customised Project Plan:

- Using the provided Gantt Chart Template, explain in detail your plan for executing the solution phase of the Double Diamond Framework and weave in concrete examples that are specific to your project.

- Highlight key milestones to be achieved, critical success factors, and risk management strategies.

5. Engagement and Delivery:

- Ensure the presentation is engaging, visually appealing, and well-coordinated among team members.
- Allocate speaking time fairly to reflect equal participation.

Submission instructions

1. Final Submission:

- Submit final slides 5pm the day before the Week 5 workshop.

2. Workbook (Miro) Contribution:

- Complete all collaborative Workbook activities before the Week 5 workshop to demonstrate teamwork and planning progress.

Note: Time requirements

- Teams will receive a one-minute warning at 4 minutes and 30 seconds.
- Teams must stop speaking at 5 minutes and 30 seconds. Unfinished sections may be addressed during Q&A.
- If your presentation goes over time, your team communication mark will be impacted: one grade level reduction for every 30 seconds over, i.e. a Distinction will go down to a Credit
- If a student speaks significantly more than their teammates and the result is that the team is over time because of this, that student's individual communication mark will also be impacted.

Note: Team contribution through Miro

- Miro is COMM1120's online collaboration tool. You will use Miro to work on your group project throughout the term.
- It is expected that each team member equally contributes to the weekly activities set on Miro.
- As outlined in the Team Agreement, each team member is responsible in being the Key Contributor for certain weeks of the term. The role of the Key Contributor is to make sure that all the activities for the nominated weeks are completed to the team's satisfaction.
- In line with the Assessment 2 Marking Rubric, Team Contribution is assessed as a group mark.
- However, if you do not adhere to the Team Agreement and fail to contribute adequately, you will be assessed individually, and your Team Contribution mark may be adjusted
- Please ensure that you sign up and always sign in to Miro using your zid@unsw.edu.au email. If you have access issues, please notify your tutor ASAP. **If you do not flag access issues with your tutor within two weeks of inaccessibility, your Team Contribution mark may also be impacted.**

Assessment 3: Solution Delivery

	During Week 10 workshop/tutorial
	30%
	Team oral presentation
	7-minute 30 seconds presentation, 3 minutes Q&A
	Live during Week 10 workshop; to be submitted on Moodle 5pm the day prior

(BCom students: myBCom course points for PLO 4)

Description of assessment task

This assessment requires your team to demonstrate the development, justification and value of an innovative solution. The task simulates a professional pitch to key stakeholders, integrating critical thinking, teamwork, and effective communication.

The presentation is a team pitch designed to persuade an audience and highlight the value of your innovative solution. Your team will:

- Present the solution and its development process.
- Highlight how the solution delivers value.
- Tailor the pitch to a specific (implied) audience, such as customers, investors, or other stakeholders.

Approach to the assessment task

Your presentation must address the following key areas:

- 1. Identifying the audience that you imagine the class to be filled with:**
 - While you don't explicitly state your audience, your presentation tone, content, and style should imply who you are pitching to. This requires aligning your language, focus, and "ask" to resonate with their interests and priorities.
- 2. Captivating Introduction:**
 - Begin with a compelling story or scenario that connects the solution to the audience's needs or pain points.
 - This story should be relatable and engaging, setting the context for why your solution is necessary.
- 3. HMW (How Might We) Statement:**
 - Share the team's HMW statement, which frames the problem you aim to solve.
 - Reflect on any changes since Assessment 2 and explain why these adjustments were made based on feedback, research, or prototyping.

4. **Solution Overview - Provide a brief description of your innovative solution:**

- What it is: Highlight the core features and functionality.
- How it works: Explain its mechanics, usability, and accessibility.

5. **Solution Development Process - Trace the journey of your solution in detail, focusing on:**

- **Ideation:** Share the creative processes and brainstorming sessions used to generate ideas.
- **Prototyping:** Describe the prototypes you created, what you learned from testing them, and how they evolved.
- **Stakeholder Engagement:** Outline how feedback from users, partners, or experts shaped the final solution.
- **Iteration:** Detail the changes and refinements made to improve the solution, backed by evidence or feedback.

6. **Personas and Value Proposition:**

- **Personas:** Introduce the target audience personas and their key characteristics (e.g. demographics, needs, goals).
- **Value Proposition:** Explain how your solution addresses the pain points and aspirations of these personas, creating clear and measurable impact.

7. **The Ask:**

- Conclude your pitch with a clear "ask", targeted specifically to your implied audience.
- **Examples:**
 - **For investors:** Highlight the resources (funding, support) required to scale the solution.
 - **For customers:** Emphasise the call to action for adoption or purchase.
 - **For other stakeholders:** Outline partnerships or advocacy needs to drive the solution forward.

Submission instructions

1. **Final Submission:**

- Submit final slides the day before Week 10 workshop.

2. **Workbook (Miro) Contribution:**

- Complete all collaborative Workbook activities before the workshop to demonstrate teamwork and planning progress.

Note: Time requirements

- Teams will be given a one-minute warning at 6 minutes and 30 seconds.
- Teams will be asked to stop speaking at 7 minutes and 30 seconds.
- If the final speaker has not been able to complete their presentation, they will present during the Q&A to ensure they are evaluated for their individual mark.
- If your presentation goes over time, your team communication mark will be impacted: one grade level reduction for every 30 seconds over, i.e. a Distinction will go down to a Credit
- If a student speaks significantly more than their teammates and the result is that the team is over time because of this, that student's individual communication mark will also be impacted.

Note: Team contribution through Miro

- Miro is COMM1120's online collaboration tool. You will use Miro to work on your group project throughout the term.

- It is expected that each team member equally contributes to the weekly activities set on Miro.
- As outlined in the Team Agreement, each team member is responsible in being the Key Contributor for certain weeks of the term. The role of the Key Contributor is to make sure that all the activities for the nominated weeks are completed to the team's satisfaction.
- As seen in the Assessment 3 Marking Rubric, Team Contribution is considered a group mark. However, if you do not adhere to the agreement made as a team and lack contribution, you will be assessed individually, and your Team Contribution mark may be impacted.
- Please ensure that you sign up and always sign in to Miro using your zid@unsw.edu.au email. If you have access issues, please notify your tutor ASAP. **If you do not flag access issues with your tutor within two weeks of inaccessibility, your Team Contribution mark may also be impacted.**

Assessment 4: The Redesign Challenge

	Week 11: 3pm, Thursday, 13 th of August 2026
	35%
	Individual submission
	Written report (1,000 words $\pm$ 10%), or static visual (infographic/poster) with equivalent depth and explanation
	Via Moodle course site, through Turnitin

(BCom students: myBCom course points for PLO 6 & 7)

Description of assessment task

You are the newly appointed CEO of a company tasked with redesigning a product or service to make it more innovative, inclusive, and relevant in today's global marketplace. The board has given you complete creative authority to reimagine how your company delivers value, but your success will depend on your ability to collaborate across cultures, lead with empathy, and apply course concepts effectively.

Approach to the assessment task

1. Set the scene:

- **Choose a product or service:**
 - Pick an existing product or service from any industry to redesign (e.g. food delivery, wearable tech, university experience etc). *Avoid choosing the same product or service from your COMM1120 team members.*
 - Explain what it does, who uses it, and why it needs redesigning.
- **Create a hypothetical context:** Set the scene and describe the cultural and global setting in which your company operates. This helps others understand the environment influencing your decisions.

Consider:

- **Cultural factors:** Where is your company based? What local values, norms, or practices shape customer needs and behaviours?
- **Global factors:** Is your company operating across countries? How do global trends (e.g. sustainability, inclusion, digital change) affect it?
- **Lived experience:** You can draw on your own culture, community or experience working in teams to make the scenario authentic but explain it clearly so it's accessible to all readers.

Examples: You might imagine a fitness app originally designed in Australia being adapted for users in India, where social norms, access to technology, and health priorities differ. Or you might reimagine the university experience for international students studying across time zones.

2. Assemble a hypothetical team of FOUR people from different disciplinary and cultural backgrounds:

- **Create personas for each team member:**
 - Using the 'Team Profile Template' on the page below, create a persona for each team member.

- Attach personas in the appendix.

- **Provide a rationale for your chosen team:**

- Explain why you, as a CEO, selected these team members and how their diversity contributes to innovation and effective collaboration. Consider:
 - **Complementary expertise:** How do different disciplines and cultures bring unique perspectives or problem-solving approaches to the redesign?
 - **Relevance to the redesign:** Why is this combination of people well-suited to reimagining your chosen product or service?
- As part of your rationale, you must critically reflect on your experiences of teamwork and collaboration throughout COMM1120 when justifying your team composition decisions. Consider:
 - What you learned about effective and ineffective teamwork
 - How different team roles, communication styles, and participation patterns influence collaboration
 - How working in your COMM1120 team informed your decisions about complementary strengths and team composition

3. Apply and evaluate course concepts:

- Select **THREE key course concepts** from the weekly online learning materials.
- Explain why you chose these three concepts: They should best align with your hypothetical context, team and chosen product or service.
- For each concept:
 - Apply it to your redesign process. i.e. how will it shape your approach, decisions, or leadership as a CEO?
 - Evaluate its strengths and limitations in your scenario.

4. Present your redesigned product or service concept:

- Explain how it improves the user experience, creates value, and demonstrates global awareness. Do this by:
 - Clearly showing the process of how you redesigned the product or service while applying the chosen three course concepts.

Note: The focus is not on whether your redesign would 'work' in the real world, but on how clearly it shows your understanding and integration of the ideas developed in earlier sections.

Structure

- You may choose one of the following formats:
 - **Written report** (1,000 words $\pm$ 10%)
 - **OR a static visual presentation:** either an infographic or a digital poster that provides an equivalent level of explanation and detail to a 1,000-word written report.
 - **To support your understanding of the submission formats, please review the samples provided on the Moodle site.**
 - **Attach the 4 personas in the appendix**
- If the submission is a written report, standard margins (not narrow margins), 1.5-line spacing, 12 font size, Arial font.
- Each page should be numbered at the lower-right corner.
- Use UNSW Harvard referencing style.

Submission instructions

- Via Moodle course site.

Assessment 4: Team Persona Template

Remember, these personas and the information included in them are fictional.

Name:

Age:

Disciplinary background:

Role in the project (i.e. Marketer):

Key responsibilities (less than 100 words description):

Unique expertise and how they will enhance creativity, inclusion and decision making during the redesign process (i.e. expert in brand storytelling...):

**You may adapt this template for your assessment submission.*

Marking Rubrics

Assessment 1: Creativity and Innovation in Daily Life

Criteria	%	High Distinction (100-85)	Distinction (84-75)	Credit (74-65)	Pass (64-50)	Fail (49-0)
Creative insight via photo & storytelling	20%	Photographs are original, symbolic, and elicit a strong intellectual or emotional response. The contextual description is rich and adds depth, showing thoughtful interpretation of creativity and innovation in practice.	Photographs demonstrate a clear and interesting representation of creativity and innovation. Contextual description is relevant and insightful, providing thoughtful support to the visual.	Photographs and context adequately relate to creativity and innovation. There is an attempt to explain significance, but interpretation may be surface-level or lacking clarity.	Photographs are basic or literal, with limited relevance to creativity and innovation. Contextual description is minimal.	Photographs do not show relevance to creativity and innovation. Contextual description is missing, unclear, or completely disconnected from the task.
Reflecting on personal perspectives	45%	Deeply reflective and highly personal analysis. Demonstrates strong self-awareness and clear connections to life experiences. Insightful exploration of how their perspectives on creativity and innovation inform their wider worldview.	Personal insights are well-developed, authentic, and connected to life experience. Reflection reveals developing awareness of their perspective of creativity and innovation in shaping wider worldviews.	Provides some personal reflection but lacks depth or clarity. Demonstrates a general awareness of personal beliefs and how it informs their perspective but misses opportunities for deeper meaning-making.	Reflection is mostly descriptive or superficial. Limited connection to personal perspective or vague discussion of how this may have been influenced.	Lacks reflection or personal insight. Does not attempt to connect experiences, beliefs, or values to creativity and innovation.
Integration of course concepts	15%	Sophisticated integration of course concepts from Week 1 throughout response, thoughtfully embedded them into the interpretation of the chosen photos. Demonstrates clear understanding of the difference between creativity and innovation.	Strong understanding of creativity and innovation. Integrates other course concepts from Week 1 well in their response to support interpretation.	Demonstrates understanding of creativity and innovation as defined in the course. Attempts to apply course concepts but may do so inconsistently or superficially.	Identifies the distinction between creativity and innovation but lacks depth. No additional course concepts are applied.	Demonstrates little or no understanding of creativity and innovation. No reference to course content or conceptual integration.
Communication skills	20%	Writing is exceptionally well-structured, meeting all assessment criteria with high clarity and logical flow. There are no grammatical or spelling errors. If referencing is used, it is accurate and appropriate. Writing is highly authentic, personal, and clearly identifiable as the student's own voice. Ideas flow logically and naturally, with nuanced expression that reflects genuine lived experience. No evidence of AI-generated or AI-paraphrased text. If referencing is used, it is accurate and appropriate.	Writing is well-structured and clear, and mostly personal in tone, meeting all assessment criteria. There may be minor grammatical or spelling errors but referencing is largely accurate if used. The student's voice is consistently present, though some sections may feel more polished or generic. Expression remains original and does not resemble AI-generated phrasing. Minor grammatical or spelling errors may appear, consistent with authentic student writing.	Writing is structured and meets most assessment criteria with clarity. Some grammatical or spelling errors are present and there may be minor referencing inaccuracies if used. Writing may rely on generic phrasing or broad statements that reduce the sense of personal voice. Some sections may appear overly polished or stylistically inconsistent, raising questions about originality.	Writing is somewhat structured, meeting the required assessment criteria with moderate clarity. There are grammatical and/or spelling errors and referencing has noticeable inaccuracies. Reflection may feel descriptive or generic, with limited individuality. Some sections may resemble paraphrased or templated text.	Writing is poorly structured, does not meet the assessment criteria, and ideas are not clearly communicated. There are multiple grammatical and spelling errors and referencing is inaccurate or absent. Text may contain patterns typical of AI-generated writing (e.g., overly formal tone, repetitive structures, generic reflections, or paraphrased definitions). Significant inconsistencies in voice or style suggest non-original authorship.

Assessment 2: Problem Definition and Plan for Innovation

Criteria	%	High Distinction (100-85)	Distinction (84-75)	Credit (74-65)	Pass (64-50)	Fail (49-0)
Problem Context (Group mark)	20%	Demonstrates exceptional depth and precision in analysing the problem. Uses tools expertly to reveal complex causes, assumptions, and ecosystem factors. Stakeholder engagement is rich, well-interpreted, and significantly shapes the team's understanding.	Presents a well-developed and insightful problem context. Uses analysis tools effectively to uncover root causes and assumptions. Stakeholder feedback is clearly integrated into the team's understanding.	Provides a clear and logical explanation of the problem, using analysis tools appropriately. Shows some meaningful insights from stakeholder engagement, though connections may lack depth.	Gives a basic description of the problem with limited depth. Uses at least one analysis tool but with minimal insight. Stakeholder engagement is mentioned but not clearly connected to the team's understanding.	Provides an unclear or superficial overview of the problem. Little or no use of analysis tools. Stakeholder engagement is missing, irrelevant, or not integrated into understanding the problem.
Problem Definition (Group mark)	10%	HMW statement is precise, insightful, and strategically framed to open meaningful avenues for innovation. It reflects deep synthesis of the problem context and stakeholder insights.	HMW statement is well-crafted, focused, and strongly aligned with the team's analysis.	HMW statement is clear and relevant, showing a reasonable link to the problem context.	HMW statement is present but broad, vague, or only loosely connected to the analysis.	HMW statement is missing, unclear, or unrelated to the problem context.
Reflective evaluation of teamwork collaboration	20%	Demonstrates outstanding teamwork and reflective insight. Clearly explains team roles, responsibilities, and how the Team Agreement supported collaboration. Uses specific examples to show how communication, participation, and teamwork contributed to innovation and project progress. Critically evaluates a teamwork challenge, adjustment, or insight and explains how the team adapted. Reflection is thoughtful, analytical, and shows strong awareness of team dynamics and diverse perspectives. During Q&A, team asks exceptionally insightful and strategic questions to other teams that demonstrate deep	Demonstrates strong teamwork and reflection. Clearly explains team roles and the application of the Team Agreement. Uses relevant examples to show how collaboration supported the project. Discusses a teamwork challenge, adjustment, or insight and explains its impact on communication, participation, or project progress. Reflection shows good awareness of team dynamics and collaboration. During Q&A, team asks thoughtful, relevant, and analytically focused questions to other teams that demonstrate strong comprehension of the presentation.	Demonstrates effective teamwork and reflection. Explains team roles and provides an example of collaboration related to the project. Shows clear understanding of the Team Agreement and identifies a teamwork challenge, adjustment, or insight. Reflection discusses how teamwork influenced project progress, though analysis may be more descriptive than critical. During Q&A, team asks competent and generally effective questions that demonstrate a reasonable understanding of the presentation. Their questions are mostly relevant and show some basic critical thinking, though they may remain surface-level or miss opportunities for deeper inquiry.	Demonstrates basic teamwork and limited reflection. Mentions team roles and provides a simple example of collaboration. Shows some understanding of the Team Agreement. Identifies a teamwork challenge, adjustment, or insight, but explanation of its impact on collaboration or project progress is limited or unclear. During Q&A, team asks simple but generally relevant questions to other teams that demonstrate a basic understanding of the presentation. Their questions tend to be simple and focused on clarification rather than deeper analysis, showing minimal critical engagement. Listening is inconsistent, and some questions may repeat information or miss central points.	Provides little evidence of teamwork or reflection. Team roles and collaboration are unclear or missing. Limited or no reference to the Team Agreement. Does not meaningfully discuss teamwork challenges, collaboration processes, or their impact on the project. During Q&A, team asks irrelevant, unclear, or ineffective questions that demonstrate little understanding of the presentation. Their questions often show irrelevance or a clear lack of understanding, and may contradict or ignore key information presented.

		understanding of the presentation and extend the discussion in original, meaningful ways. The team demonstrates active listening and responds directly to nuances in the presenting team's content.				
Feasibility of planned approach to managing project (Group mark)	15%	The proposed management plan is exceptionally practical, well-reasoned, and shows evidence of thorough risk assessment and contingency planning.	The management plan is practical, detailed, and includes consideration of potential risks and alternative strategies.	The plan is realistic and shows an understanding of key management principles, with some risk assessment.	The plan is somewhat practical with a basic outline of management steps and limited risk assessment.	The plan lacks practicality, detail, and understanding of project management principles and risks
Completion of collaborative online workbook (Miro) (Group mark)	10%	Exceptional use of workbook with detailed, relevant, and creative contributions that significantly enhance planning.	Strong use of the workbook with relevant contributions that support the planning process.	Adequate completion of the workbook with clear contributions to the project.	Basic use of the workbook with some relevant contributions.	Inadequate use of the workbook with limited or irrelevant entries.
Individual presentation skills (Individual mark)	25%	Demonstrates exceptional delivery with engaging, persuasive communication and professional, high-quality visuals. Time is managed exceptionally well.	Shows strong delivery with clear and persuasive communication and appropriate visual aids. Time is managed effectively.	Presentation is clear, visually coherent, and mostly well-coordinated. Time is well managed.	Presentation is understandable but may lack engagement or smooth transitions. Visuals are basic. Time management is adequate	Presentation is unclear, unengaging, poorly coordinated, or significantly over/under time. Visuals are ineffective or missing.

Assessment 3: Solution Delivery

Criteria	%	High Distinction (100-85)	Distinction (84-75)	Credit (74-65)	Pass (64-50)	Fail (49-0)
Development of innovation (Group mark)	20%	Demonstrates a sophisticated understanding of the innovation process using the solution diamond effectively, with robust evidence and a comprehensive process description. Shows exceptional ability to apply various tools to identify, prototype, and test solutions, offering deep insights into the feasibility and sustainability of the innovation.	Shows a clear understanding with strong evidence and detailed process description. Articulates a well-thought-out approach to developing the innovation, considering various aspects like scalability and user adoption.	Provides a clear and logical explanation of the development process, including ideation and prototyping.	Gives a basic description of the innovation process with limited detail. Mentions some steps (e.g., ideation or prototyping) but without depth.	Provides an insufficient description of the innovation process with little to no evidence. Does not demonstrate effective use of the solution diamond tools, showing a lack of understanding in developing a viable innovation.
Evaluation of innovation (Group mark)	10%	Offers a compelling and well-substantiated assessment of the innovation's value. Presents a critical analysis with extensive data and research, demonstrating the innovation's potential for significant change. Delivers a compelling, evaluation based on stakeholder feedback, critically evaluates how the feedback has impacted the innovation iterations and demonstrates deep understanding of user needs.	Provides a strong evaluation with clear insights into value created. Demonstrates good analytical skills in assessing the innovation's effectiveness and potential reach. Provides detailed stakeholder feedback, its impact in the innovation iterations and clearly articulates the innovation's feasibility.	Gives a clear evaluation with a good understanding of the value created. Provides a solid but less comprehensive assessment of the innovation's impact. Stakeholder feedback is discussed, however its impact in the innovation iterations is lacking.	Presents a basic evaluation with some understanding of the value created. Evaluates the innovation on a surface level, with minimal depth in the potential social impact. Stakeholders were mentioned but lacks details on the feedback gathered.	Lacks a clear evaluation or understanding of the innovation's value. Provides an inadequate or unsubstantiated assessment of the innovation's potential impact. No mention of stakeholder feedback.
Persuasive and cohesive communication as a team (Group mark)	10%	The presentation is highly persuasive, engaging, and professionally coordinated. All team members contribute confidently and cohesively, demonstrating a clear unified team vision. The presentation is well-structured, flows smoothly, and communicates the innovation effectively. The team manages time exceptionally well and responds to questions collaboratively and insightfully during the Q&A.	The presentation is persuasive, well-organised, and clearly coordinated. All team members contribute effectively and support a consistent team message. The presentation communicates the innovation clearly and maintains audience engagement. Time is managed well, and the team responds confidently to questions during the Q&A.	The presentation is clear and mostly cohesive, with most team members contributing appropriately. The team demonstrates coordination and communicates the innovation effectively, though some transitions or sections may lack integration. The Q&A responses are generally clear. The presentation meets time requirements.	The presentation communicates the main ideas but lacks consistency in coordination or persuasiveness. Some team members contribute unevenly or appear less prepared. Team integration is limited, and delivery may feel uneven at times. Responses during the Q&A are basic or unclear. The presentation is close to the time requirements.	The presentation lacks coordination, cohesion, and persuasive communication. Team members appear unprepared or disengaged, with little evidence of a unified approach. Communication is unclear or ineffective, and the Q&A is poorly handled or not addressed meaningfully. The presentation does not meet time requirements.
Team contributions to online workbook (Group mark)	10%	The team's use of the online workbook is exemplary, indicating high engagement and collaborative effort.	The team's use of the workbook is comprehensive and indicative of a collaborative approach.	Team contributions to the workbook are evident and support the project's development.	Team contributions to the workbook are adequate but lack thoroughness.	Team contributions to the workbook are insufficient and do not effectively support the project.

Individual presentation skills (Individual mark)	50%	Exhibits exceptional presentation skills with a memorable and engaging delivery. Utilises a range of communication techniques to captivate the audience and clearly articulate their component of the presentation.	Displays very good presentation skills with a clear and convincing delivery. Communicates effectively, though with minor areas for improvement in engagement or clarity.	Shows good presentation skills with effective delivery. The presentation is solid but may not be as polished or engaging as higher distinctions.	Has adequate presentation skills with a basic delivery. The presentation conveys the main points but lacks the finesse of higher-level presentations.	Lacks effective presentation skills with poor delivery. Struggles to convey the innovation's value and fails to engage the audience.

Assessment 4: The Redesign Challenge

Criteria	%	High Distinction (100-85)	Distinction (84-75)	Credit (74-65)	Pass (64-50)	Fail (49-0)
Innovation and feasibility	20%	The redesign is highly original, with creative, forward-thinking ideas that clearly enhance the user experience or market offering. Feasibility is carefully considered in the hypothetical context, including implementation, resources, and market factors. Adds strong value and shows strategic insight.	The redesign is creative, introducing meaningful improvements. Feasibility is mostly addressed with attention to context and practical constraints. Shows user benefit and sound strategic thinking, though some assumptions or gaps remain.	The redesign shows some creativity, but originality is limited. Feasibility is partially addressed, with uneven attention to context or constraints. Value to the user is acknowledged but not well developed.	The redesign is basic with minimal originality. Feasibility is vaguely considered. Practical insight and user value are limited. Improvements are superficial.	The redesign lacks originality or is unrealistic. Feasibility and value to the user and their context are not considered. The concept is poorly thought out or irrelevant.
Global and cultural competence	15%	Demonstrates advanced understanding of different disciplinary and cultural perspectives within the hypothetical context and team. The redesigned product or service reflects this through clear integration of diverse user needs. Shows deep insight into how global and contextual factors shape innovation and collaboration.	Strong awareness of different disciplinary and cultural perspectives. Team and redesign reflect inclusivity and relevance, though some perspectives may be underexplored. Demonstrates thoughtful understanding of global and contextual factors.	Some consideration of various disciplinary, cultural or global perspectives and contexts, but integration is basic or uneven. Limited evidence of attention to user diversity or cross-cultural teamwork.	Minimal recognition of disciplinary, cultural or global factors. Integration into the redesign is weak or superficial. Awareness of diversity is present but underdeveloped.	No evidence of disciplinary, cultural or global awareness. Redesign may be insensitive or fail to consider cultural and contextual relevance.
Strategic team composition and team rationale	15%	Team composition is strategically justified with clear links to the personas and hypothetical context. The submission demonstrates strong insight into how diverse, complementary skills support innovation. Leadership approach is well explained, showing deep understanding of collaboration, decision-making, and team dynamics.	Rationale for team selection is thoughtful and mostly well linked to the personas and hypothetical context. Leadership approach is clearly described and considers collaboration and diversity. Minor gaps in strategic clarity or contextual reasoning.	Team roles and leadership approach are explained with some connection to the personas and hypothetical context. The rationale is reasonable but lacks depth or full alignment to the scenario or innovation goals.	Minimal justification for team or leadership choices. Limited connection to the personas or hypothetical context. Collaboration and leadership concepts are mentioned but underdeveloped.	No clear rationale for team composition or leadership. Personas are incomplete, irrelevant, or not meaningfully used. Shows poor understanding of collaboration or leadership in context.
Reflective evaluation of team composition and collaboration	10%	Demonstrates outstanding reflective insight into teamwork, collaboration, and team dynamics. Critically evaluates how prior teamwork experiences informed decisions about team composition, complementary strengths, communication approaches, and collaboration. Reflection is thoughtful, well-justified, and clearly explains how effective teamwork supports innovation and problem-solving.	Demonstrates strong reflection on teamwork experiences and collaborative processes. Clearly explains how prior experiences informed decisions about team composition, communication, and complementary strengths. Reflection shows good awareness of how collaboration contributes to innovation and team outcomes.	Provides a clear reflection on teamwork experiences and collaboration. Identifies relevant insights about participation, communication, or team dynamics that informed team composition decisions. Demonstrates a general understanding of how collaboration supports team outcomes.	Provides a basic reflection on teamwork experiences and collaboration. Identifies limited insights into participation, communication, or team dynamics. Connections between prior teamwork experiences and team composition decisions are descriptive or underdeveloped.	Provides little or no meaningful reflection on teamwork or collaboration. Demonstrates limited understanding of team dynamics or collaborative processes. Connections between prior experiences and team composition decisions are unclear, irrelevant, or missing.
Application of course concepts	30%	Three course concepts are expertly selected and clearly justified, with each concept being critically analysed. The rationale for prioritising these concepts	Three relevant course concepts are applied and explained with clear links to leadership and redesign choices. Critical analysis of each	Three course concepts are described and applied with partial clarity. Some connection to leadership or redesign decisions is	Course concepts are mentioned but applied inconsistently or descriptively. Critical analysis is minimal or missing. Rationale for	Few or no relevant course concepts are applied. There is no evidence of critical analysis. And no

		over others is well explained. Concepts are integrated with leadership decisions and redesign outcomes, demonstrating sophisticated understanding and the ability to connect theory with practice.	concept is present but may not be fully developed or consistently deep. The rationale for their selection is sound, though not fully developed. Demonstrates strong understanding and generally effective integration of theory and practice.	evident, but justification for their selection is limited or implicit. Shows developing understanding of theory in practice. The writing demonstrates understanding but lacks deeper critical engagement.	selection is unclear or missing. Links to leadership or redesign are weak or superficial.	rationale for concept selection. Demonstrates minimal understanding or ability to apply theory to the redesign task.
Communication and presentation	15%	Communication is clear, purposeful, and engaging. The submission is well-structured and coherent, with strong visual or textual flow. Design or formatting enhances understanding. Language and tone are highly professional and suited to the chosen format (written or visual). No evidence of AI-generated or AI-paraphrased text. If referencing is used, it is accurate and appropriate.	Communication is clear and mostly engaging. The submission has logical structure and good flow. Visual or design elements support clarity. Language is professional and appropriate to the format (written or visual). Expression remains original and does not resemble AI-generated phrasing. Minor grammatical or spelling errors may appear, consistent with authentic student writing.	Communication is generally clear. Structure and flow are adequate, though uneven in places. Formatting supports meaning but may lack refinement. Style and tone are mostly suitable, with some inconsistencies. Some sections may appear overly polished or stylistically inconsistent, raising questions about originality.	Communication is understandable but lacks polish. Organisation is basic or unclear in places. Formatting or visual choices are underdeveloped. Language and tone are inconsistent or occasionally inappropriate Writing may feel descriptive or generic, with limited individuality. Some sections may resemble paraphrased or templated text.	Communication is unclear or poorly executed. Submission lacks logical structure or coherence. Visual or design elements detract from meaning. Language and tone are unprofessional or inappropriate to the task. Text may contain patterns typical of AI-generated writing (e.g., overly formal tone, repetitive structures, generic reflections, or paraphrased definitions). Significant inconsistencies in voice or style suggest non-original authorship.
